			2	Check if four version are available	Four version are available
5	Number of tasks in public and final version	Win 7/8 or newer MrBuggy3, competitor mode	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Count number of available tasks with "Następne" button	There are fifteen tasks

6	Summary report	Win 7/8 or newer MrBuggy3, server mode	1	Turn on MrBuggy3 server mode	Application running
			2	Log in using login and password	Application running user logged in
			3	Generate report using "RAPORTUJ" button	Application generates report
7	Unexpected shutdown	Win 7/8 or newer MrBuggy3, competitor mode	1	Turn on MrBuggy3	Application running
			2	Log in using login and password	Application running user logged in
			3	Turn off application using task manager	Application turned off
			4	Repeat steps 1,2	Application displays state before shutdown
8	Task number	Win 7/8 or newer MrBuggy3, competitor mode	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Check number of tasks area	Current number of task is displayed
9	'Zakończ" button	Win 7/8 or newer MrBuggy3, competitor mode	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Use "ZAKOŃCZ" button and confirm	Application is turned off and sends answers to evaluate
10	Finding and reporting deffects	Win 7/8 or newer MrBuggy3, competitor mode	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed

			3	Check for deffects and report it in each task using answers table	Application allows to find one defect in each task and allows to report it
11	Defect report in team member mode	Win 7/8 or newer MrBuggy3, member team mode	1	Turn on MrBuggy3, team member mode	Application running
			2	Log in using login and password	First task is displayed
			3	Report defect using "Raportuj" button	Funcionality disabled
12	Mode change while running	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application running
			2	Log in using login and password	First task is displayed
			3	Change mode while logged in	Unable to change mode
13	Application language	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Check application funcionalities and specification	Everything is written in polish
14	Server part Win7 support	Windows 7, MrBuggy3	1	Turn on MrBuggy3 server mode	Application running
15	Mnual change of granted points	Win 7/8 or newer MrBuggy3, server mode	1	Turn on MrBuggy3 server mode	Application running
			2	Log in using login and password	MrBuggy3 server mode interface displayed
			3	Change manually points granted to team	Granted points changed
16	Time funcionality	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application running
			2	Log in using login and password	First task is displayed

				or run without logging	
			3	Check "Time" field	'Time" shows remaining time
17	Problem description	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Check "problem description" area of interface	Problem description is displayed
18	Tasks demo/final versions	Win 7/8 or newer MrBuggy3 demo and final version	1	Turn on MrBuggy3 final version	Application running
			2	Log in using login and password or run without logging	First task is displayed
			3	Check tasks in final versions	Type of tasks noted
			4	Turn on MrBuggy3 demo version	Application running
			5	Check task in demo	Task from demo version is not present in final version
19	Installer	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application is running, installer not needed
20	Interface response	Win 7/8 or newer MrBuggy3	1	Turn on MrBuggy3	Application running
			2	Check response time of interface	Application is responding in less than one second
